 CORRESPONDENCE SECTION

Gentlemen:

We are transmitting copies of the final document entitled "Summary and Analysis of Results, Field Treatability Study Phase II: South Walnut Creek Basin Surface Water Interim Measure/Interim Remedial Action, Operable Unit No. 2." This is an Interagency Agreement deliverable due January 26, 1994.

This report incorporates your comments and the correct sampling data analysis for SW-132. This report also evaluates the collection, treatment, and ARAR compliance from SW-59, SW-61 and SW-132. Based on review of the water quality at collection points SW-61 and SW-132, we are again requesting approval to discontinue collection from these two sources. The basis of this request is that the level of contamination is very near ARAR standards (with low exceedances occasionally) even without treatment.

Also, find attached a summary of modifications made to the draft report.

If you have any questions, please contact Scott Grace of my staff at 966-7199.

Sincerely,

Martin McBride

Martin H. McBride
Acting Assistant Manager for
Environmental Restoration
